

Training Report on Integrated Road Accident Database(iRAD)

iRAD is an initiative of Ministry of Road Transport and Highways(MORTH) developed by National Informatics Centre in collaboration with IIT Madras.

Objective of iRAD

“Safe Roads for all in India”

Stakeholder Departments

- Police
- Transport
- Health
- Highways

Role of Stakeholder Departments

The iRAD application is horizontally integrated between Police, Transport, and Highways & Health Departments currently to facilitate timely exchange of information among the users of different stakeholders of States / Union Territories in the country.

About iRAD APP

View / update access of iRAD application is being provided through customized web & mobile interfaces for the various users / stakeholders. The same application will be used by all the States/UTs with respective logo and language selection facility

As of 17/06/2022, training of all stakeholder departments stands completed.
